### All-Axis Servo Driven Take-Out Robot for Energy-Smart Manufacturers

Compared to older models, YC series robots benefit from much lighter components and structures by incorporating design optimization technology. This weight reduction results in significantly better energy efficiency and longevity. Design optimization also targeted factors like natural oscillation and damping characteristics to greatly reduce arm vibration. The YC II -100/150/250 is sized for 80-300 tf molding machines.

### E-touch compact-YC PAT.

- ECO Vacuum
  - ECO Monitor
  - Predictive Maintenance
- Continuously monitors robot during operation and alerts operator with a message if potential trouble symptoms are detected. This function elevates maintenance from preventative to predictive.
- Standard equipment
